

Computer Professionals, Inc.

Senior Front-end Web Developer | Contractual

February 15, 2023 - present

AZ Touch

<https://touch.allianzpnblife.ph/>

- Create UI/UX via figma with ndbx as reference
- User guide manual documentation
- User profile
 - UI enhancement
 - If the user has multiple policies and wants to edit his information, before it's not possible that only a certain policy will be updated. I was tasked to create a dropdown where user can switch between policies if he wants to edit his information on certain policies only and integrate the api
- Billing details
 - Pay premium via maya using card where they can also save it so the user won't have to manually input the card details every time
 - Manage card where user can delete or add a card
 - User can also opt to enroll their policy to auto-pay
 - Transaction history page ui and api integration
- Bug ticket fixing
- Knowledge transfer sessions
- We do stand ups everyday so everyone is updated or in sync with each other. We also do poker planning and sprint planning and tackle what went good and wrong during the sprint for improvement. The team is composed of a scrum master, backend developers, frontend developers, a UI/UX, a QA, a business analyst, and the business owner.

Tech stack/tools/frameworks used: jira, github, angular 15, postman, visual studio, figma, toad, scss, rxjs, typescript, OOP
